ARKLINE HOME & OFFICE FURNITURE · ADMIN GUIDE

Running your website: a 10-minute guide

Everything the Arkline team needs to answer customers and keep the website up to date. No technical knowledge needed, and nothing can be deleted by accident: every delete asks first, and most can be undone.

GETTING IN

Signing in

1. Open **your website address followed by /admin** (for example arklineofficefurniture.pages.dev/admin). Bookmark it, or add it to your phone's home screen.
2. Tap **Continue with Google** and choose the Arkline Gmail. Or type the email and password; tap the 👁 in the password box to check what you typed.
3. On a phone, the **☰ button** at the top opens the menu: Requests, Photos, Prices, Website text, Account.

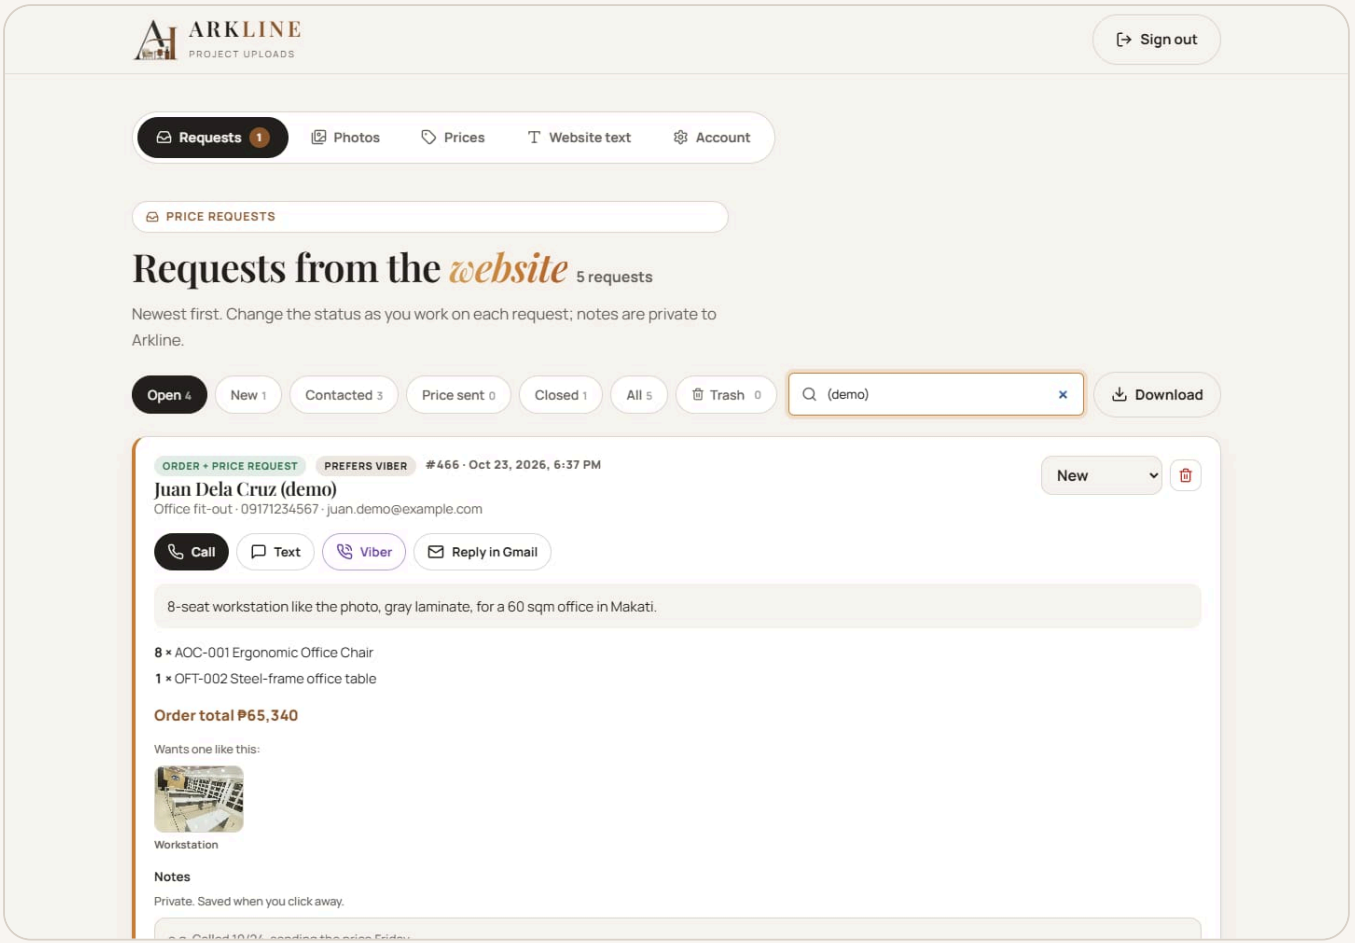

Forgot the password?

1. On the sign-in screen tap **Forgot password?**, enter the email and tap **Send reset link**.
2. Open the newest email from Supabase and tap the link. It works once and for about an hour.
3. Type the **new password twice** (8+ characters, letters and numbers) and tap **Save new password**.

EVERY DAY

Answering customers

New orders and price requests arrive in **Requests**, newest first. The red number on the tab shows how many are still new.

1. **Pick what to see.** The switch at the top shows **All**, only **Orders**, or only **Price requests**. Each shows how many there are, and a brown number for the new ones. It works together with the status buttons: **Orders** + **New** = orders nobody has answered yet.
2. **Read the label. Order** = the customer picked shop items; the card shows their **delivery address**, so confirm stock, delivery fee and the 70% down payment. **Price request** = custom work; work out a price. "Prefers Viber" shows how they want to be contacted.
3. **Reply in one tap:** Call, Text, Viber, Messenger, or **Reply in Gmail**, which opens an email that's already written. Replace the part in [brackets] with the real price and details, then send.
4. **Change the status** so the team knows where each customer is (see the table below).
5. **Add a private note** like "Called 10/24, sending price Friday". It saves when you tap outside the box. Customers never see notes.
6. **Find a customer** by typing their name, phone, email or #number in the search box. Search looks through every request, closed ones too, whatever status button is on. The 🗑 button with a number opens Trash.

STATUS	USE IT WHEN
NEW	Just arrived; nobody has replied yet.
CONTACTED	You've called or messaged them; you're working out details.
PRICE SENT	They have the full price and are deciding.
CLOSED	Finished: ordered and delivered, or they decided not to. Closed requests leave the "Open" list but are kept.

> **Spam or a test?** Tap the 🗑 on the request to move it to **Trash**. Change your mind? Open the **Trash** filter and tap **Restore**. **Delete forever** (only inside Trash) erases it and its photo for good.

EVERY FRIDAY

Keep a backup of your requests

1. In **Requests**, tap **Download** (the ⬇ button next to search).
2. A file named like **arkline-requests-2026-10-30.csv** is saved. It opens in Excel or Google Sheets, with every request, item, total, contact detail and note.
3. Upload it to a **Google Drive** folder called "Arkline backups". The website's free plan keeps no backups, so this file is your copy.

WHEN SOMETHING CHANGES

Updating the website

Changes show on the website **within 30 seconds** of saving. Refresh the website to check.

Photos: show new work

1. Choose the **category**, an optional caption, then pick photos from your phone and tap **Upload**. They're shrunk and stamped with the see-through Arkline logo in the centre automatically, so competitors can't reuse them unmarked.
2. The 🗑 on a photo moves it to **Trash** at the bottom. The round **Trash** button in the bottom-right corner jumps straight there (it shows how many photos are inside), then turns into **Top** to go back up. **Restore** brings a photo back.
3. **Delete forever** works only for photos you uploaded. The website's original photos can be hidden and restored, never lost.
4. **New category** (e.g. "Operable Wall"): tap **Add a new category** under the category picker, type the name, tap **Add category**. It appears on the website once it has photos.
5. **Remove a category:** select it in the picker and tap **Delete category**. It asks first, and also deletes the photos you uploaded to it. Removing an original category only hides it; add it again with the same name to bring its photos back.

Prices: chairs and tables

1. Change a name, price or feature (one per line) and tap **Save**. For a range, fill "Price to"; leave it empty for one fixed price.
2. Out of stock for now? Untick **Show on website** and Save. Tick it again later.
3. **Add chair / Add table** creates a new item. **Delete** removes one for good, so prefer unticking.
4. **"Starts at" prices** at the bottom show a rough price on each project type, e.g. 18000 + "per seat". ✕ clears a row; nothing changes until you tap Save.

Website text

1. Edit the headline, services, "how to order" steps, FAQs, phone numbers, email, address, Facebook page and Viber number.
2. Put ***stars*** around a word in a headline to colour it gold.
3. Each section has its own **Save**. **Restore original** brings back the launch wording if an edit goes wrong.

Account

1. **Change password:** type the current one, then the new one twice.
2. Used a shared or borrowed phone? **Sign out on all devices** signs out everywhere, including there.
3. **Auto sign-out:** after 30 minutes without use the admin page signs itself out, with a one-minute warning first. Change the time (15 minutes to 2 hours, or Never) under Auto sign-out.

STAY SAFE

Good habits

- [ ] **Turn on 2-Step Verification** for the Arkline Gmail at myaccount.google.com/security. That Gmail is the key to the admin page.
- [ ] **Don't share the password** in chat or on paper. Each staff member who needs access can be added as their own admin.
- [ ] **Download the requests backup every Friday** and keep it in Google Drive.
- [ ] **Sign out** on any phone or computer that isn't yours.
- [ ] **Reply within one business day.** The website promises customers this, under the Send button.
