ARKLINE HOME & OFFICE FURNITURE · CUSTOMER SIDE

What your customers see, and how to try it

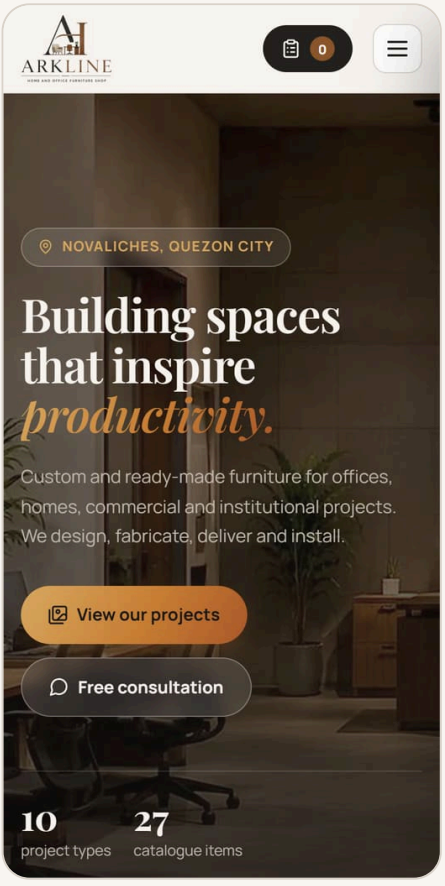

A walk through the website the way a customer uses it, from browsing your projects to sending an order. Try each step on your own phone; anything you send arrives in the admin page as a real request.

> **Test website (dry run):** arklineofficefurniture.pages.dev
> Your own address (for example arklinefurniture.com) replaces it when the domain is bought. Everything else stays the same.

STEP 1

The home page

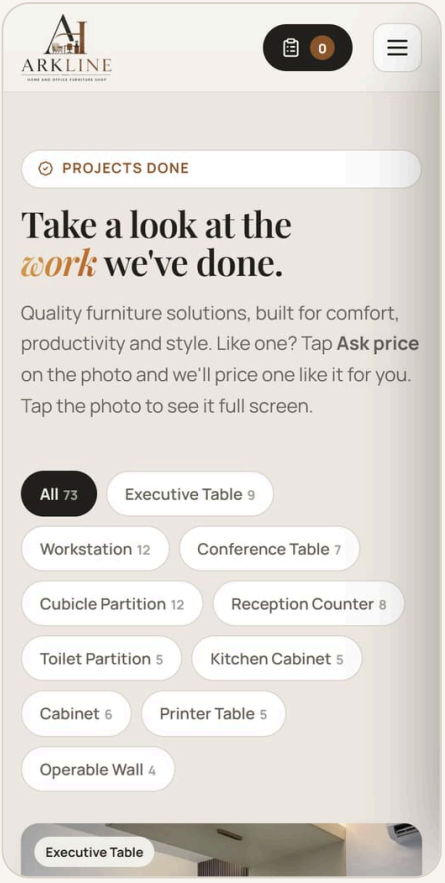

1. Customers land on a full-screen banner of your best work, with your location and two buttons: **View our projects** and **Free consultation**.
2. The ☰ button (top right) opens the menu: Projects, Shop, Services, About, FAQ and Contact.
3. The **clipboard button** with a number is the customer's order list. It counts the items and liked photos they've picked.

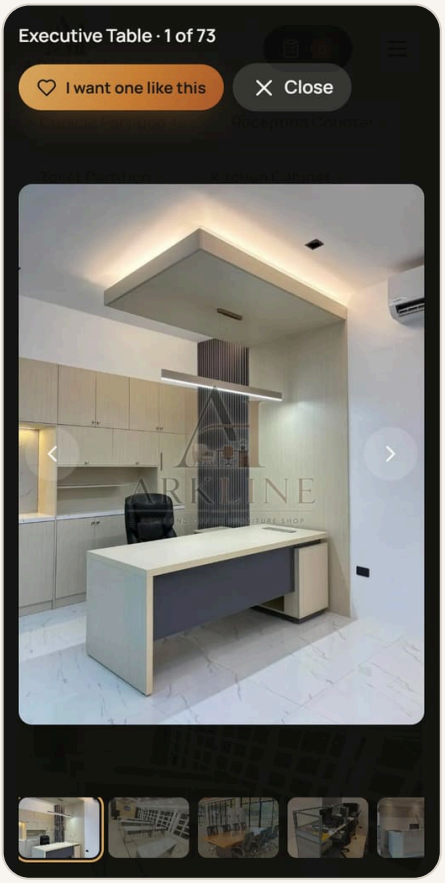

STEP 2

Browsing your projects

1. Customers pick a category (Workstation, Conference Table, Operable Wall and so on) to see only those photos. The number shows how many photos each has.
2. Every photo has an **Ask price** button. One tap adds it to their price request (the button turns brown and says **Added**), so you see exactly what they mean. A message offers **Undo** in case it was a mistake.
3. Tapping the photo itself only opens it full screen, where **I want one like this** does the same as Ask price. Scrolling past a photo never adds it.

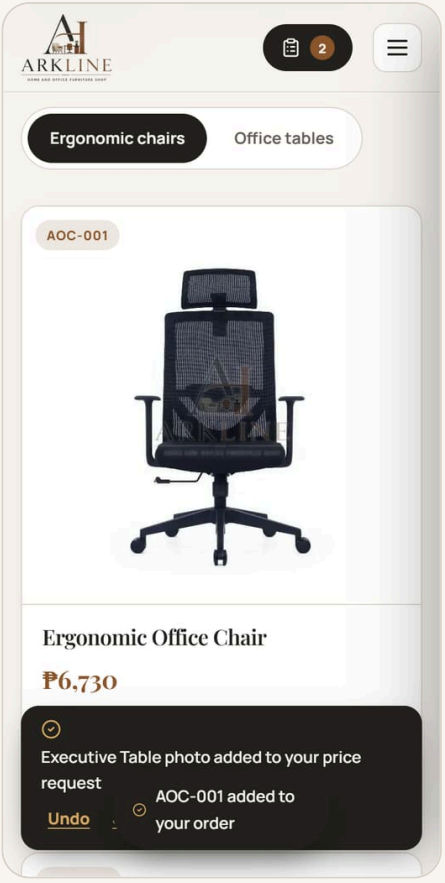

- Every photo carries the see-through Arkline logo, so competitors can't reuse it unmarked.
- New photos you upload in the admin page appear here within about 30 seconds.

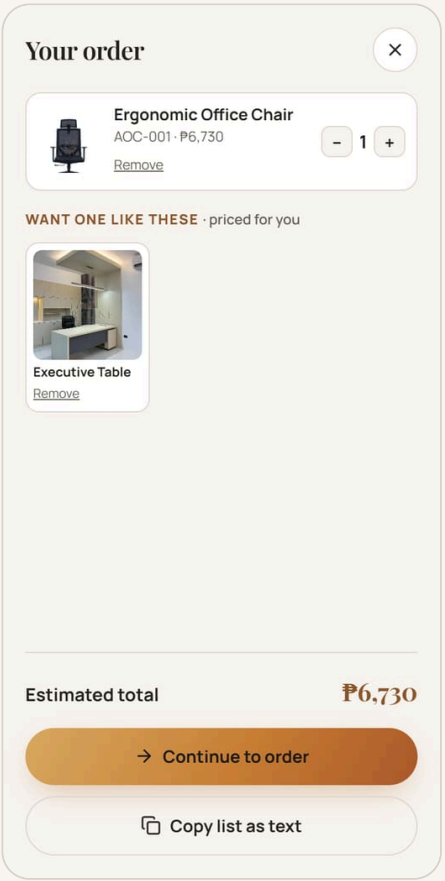

STEP 3

Shopping for chairs and tables

1. In **Shop**, customers switch between **Ergonomic chairs** and **Office tables**, see the price and features, and tap **Add to order**.
2. Prices come from the **Prices** tab in the admin page. Change a price there and it changes here.

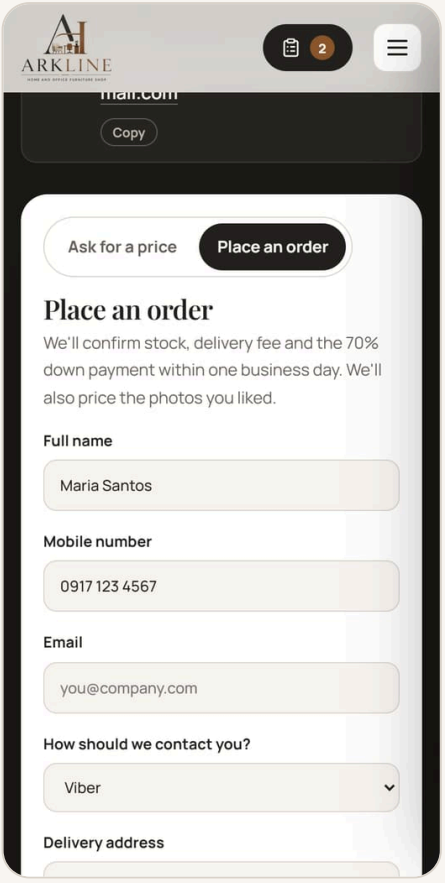

1. The order list shows each item with **−** / **+** for quantity, the liked photos, and the **estimated total**.
2. It stays on their phone even if they close the page and come back later.
3. **Continue to order** takes them to the form.

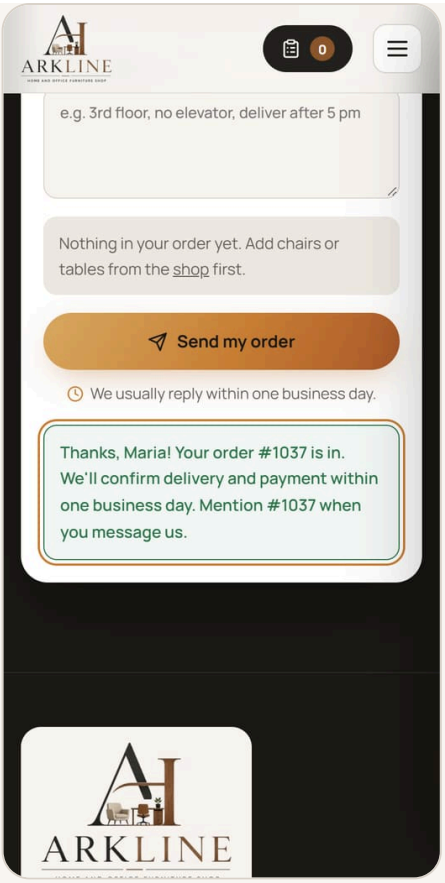

STEP 4

Sending an order or asking for a price

1. The form has two tabs at the top. **Ask for a price** is for custom work or liked photos. **Place an order** is for chairs and tables picked in the Shop. **Continue to order** opens the right tab by itself.
2. Both tabs ask for their name, a mobile number or email, and **how they want to be contacted**: call or text, Viber, Messenger or email. Messenger also asks for their Facebook name or link, plus a mobile or email as a backup in case you can't find them.
3. **Ask for a price** also asks for the project type and what they need, with an optional photo or sketch of their space. **Pick from our projects** opens your project photos right inside the form, so they can tick the ones they like without scrolling back up. Each picked photo has an **×** to remove it.
4. **Place an order** shows the items and total, and asks for the **delivery address** so you can tell them the delivery fee, plus optional delivery notes (floor, elevator, time).
5. If something is missing or mistyped (like a short mobile number), the form says exactly what to fix.

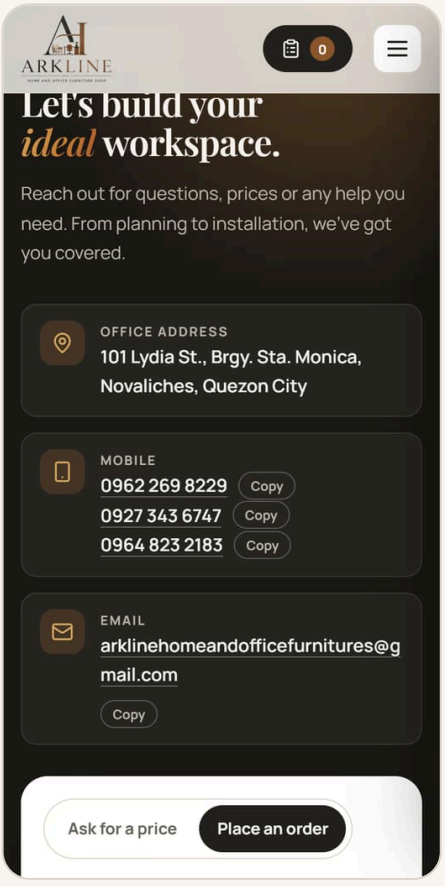

1. After sending, the customer gets a **request number** (like #754) and the promise of a reply **within one business day**.
2. At the same moment the request appears in the admin page under **Requests**, with buttons to call, text, Viber, Messenger or email them.

STEP 5

Contacting you directly

1. The Contact section shows your address, mobile numbers and email. On a phone, **tapping a number starts a call** and tapping the email opens their email app. **Copy** copies it.
2. Messenger and Viber buttons appear once your Facebook page and Viber number are filled in under **Website text** in the admin page.

DRY RUN

Try it yourself: checklist

Do these on your own phone, then open the admin page to see what arrived. Tell us anything that looks wrong or confusing.

- [ ] Open the test website. The banner, projects and prices load.
- [ ] Pick a category and tap **Ask price** on a photo. In the form, try **Pick from our projects**.
- [ ] In Shop, add one chair and one table. Change a quantity in the order list.
- [ ] Send the form with your real name and number, marked "TEST" in the message. You get a request number.
- [ ] Open **arklineofficefurniture.pages.dev/admin**, sign in, and find your test request under Requests.
- [ ] Tap a phone number in Contact. Your phone offers to call it.
- [ ] When done, move your test requests to **Trash** in the admin page.

> **Prices, photos and text** on this test website are the real ones. Change them in the admin page and the test website updates within about 30 seconds.
